DEMIR KAPIJA 2008

This international climbing meet includes, training for route setting, climbing new routes, excursions, the Ultimate Route festival and presentation.

Demir Kapija is small town in the middle of Macedonia and a very famous place. The mining in Demir Kapija is at the Iron Gate, where climate conditions are changing from north to south in Macedonia, from Intercontinental to Mediterranean climate conditions.

The cliff is quality limestone rock with big opportunities for sport climbing, multi-pitch

climbing and traditional climbing. Currently there are 100 routes, but there are opportunities for opening more than 1000 routes! The rock is 400m high and it is divided in 5 regions, 300m along.

Because of that we are organizing a climbing camp "Discovering New Cliffs" to climb new cliffs, to open new routes, to make rock treks around the cliffs etc.
